GRIDIN'S GROUP

AUTOMATIC WELDING EQUIPMENT

ESAB®

A2, A6 PEK Control Unit

*Instructor of Training Center **Sergey I.***

Gridin's Group Training Center in Klaipėda:

- conducts training for welders to raise their qualifications;
- organizes certification according to ISO 9606-1÷3 and EN 14732 standards.
- conducts testing, skill development, attestation & certification services for company employees.

"Automatic welding is widely used in Offshore projects, in Shipbuilding for welding thick metal sheets, joining pipes of large diameter and thickness. Such equipment increases welding speed and productivity.
After completing arc welding with one electrode wire, we organize certification according to welding processes upon request (automatic welding/procedure 121).
We have excellent conditions in Klaipėda to train employees with exceptional new equipment. Upon completing the training employees goes straight to production."

The Training Center provides exceptional conditions for training automatic welding specialists with exclusive, new ESAB automatic welding equipment.
